

Aditya Gupta

adityagupta.nits@gmail.com | LinkedIn | GitHub

Summary

Software Engineer with 3+ years of experience in Python, automation, CI/CD and SQL, pivoting to AI/ML. Hands-on with ML foundations and actively building GenAI projects focused on LLMs for text/conversational use cases. Strengths in disciplined engineering, stakeholder communication, and shipping reliable services on cloud. Immediate goal: deliver end-to-end, production-ready RAG and intent classification systems in Azure.

Education

NIT Silchar – B. Tech. in Computer Science & Engineering
CGPA: 8.54/10

Jul. 2018 – May 2022

Technical Skills

Programming: Python, C++, SQL

ML/GenAI: scikit-learn, pandas, NumPy, Hugging Face Transformers, LangChain, Prompt Engineering, RAG (in progress), Evaluation (RAGAS – in progress)

Deep Learning: PyTorch (in progress)

Cloud & DevOps: Azure Cloud, GitHub, Jenkins, CI/CD Pipelines

Data Analysis: SQL Optimization, Data Analysis, Experimental Methodologies

AI/ML Learning & Development

Self-Directed Learning

- Actively learning machine learning through hands-on practice with Python libraries for data analysis and modeling
- Studying supervised and unsupervised learning algorithms, statistical modeling, and optimization techniques
- Using AI tools (GitHub Copilot, Claude) to accelerate learning and improve coding practices
- Building foundational knowledge in probability theory, experimental design, and statistical analysis

Professional Experience

Software Engineer, Optum Global Solutions – Bengaluru, KA

Jul. 2022 – Present

- Built automation frameworks from scratch using Python (Selenium) and C# (LeanFT), reducing manual testing by 25%
- Developed reusable API test suites and integrated them into production workflows using Git and CI/CD pipelines
- Created SQL stored procedures and optimisation scripts that improved database query efficiency by 98%
- Detected critical system memory leak, preventing faulty production deployment through analytical debugging
- Collaborated with cross-functional teams in agile environment, presenting technical analysis to stakeholders
- Led QA activities across multiple teams during high-pressure release cycles ensuring production stability

Achievements & Personal Projects

- Consistently rated "Exceeds Expectations" in performance reviews
- Recognized in Q4 Kickoff meeting for outstanding automation contributions
- **Email Spam Filter (Python):** Built a spam classifier using scikit-learn with data cleaning and model evaluation.
